

# Faris Begić

## SOFTWARE ENGINEER

---

### Professional Summary

I am a versatile engineer with a deep commitment to creating meaningful digital experiences. My approach combines technical expertise with creative problem-solving to deliver solutions that resonate with users and drive results for clients. Throughout my career, I've cultivated a diverse skill set that allows me to adapt to new challenges and stay ahead of emerging technologies. I believe great work happens at the intersection of innovation, functionality, and thoughtful design

### Work Experience

#### Full Stack Engineer | Dec 2023 - Present

[ManpowerGroup](#)

Performing the development of an internal application, focusing on backend architecture using Java, MySQL, and AWS services, while contributing to frontend tickets with React. Ensuring scalability, performance, and maintainability in a high-traffic environment by leveraging AWS for cloud infrastructure and deployment.

#### Full Stack Engineer | Nov 2022 - Nov 2023

[Ministry of Programming](#)

Developed a social media mobile app for the tourism industry, primarily handling backend development with Node.js and PostgreSQL. Also contributed to the frontend of the landing page and admin dashboard using React and Next.js. Focused on optimizing SQL queries and delivering a bug-free user experience, as well as utilizing AWS Services for image and video saving and processing.

#### Backend Intern | Sep 2022 - Dec 2022

[Ministry of Programming](#)

Developed high-performing SaaS and scalable backend solutions using Node.js during a three-month internship. Gained hands-on experience with building API endpoints, implementing authentication and authorization, sending emails, and integrating third-party services such as SendGrid, Slack. Collaborated closely with senior developers in a fast-paced, team-oriented environment, enhancing both technical and communication skills while working on real-world projects.

### **Full Stack Engineer | Nov 2021 - Nov 2022**

Future Leaders Summit (FLS)

Built and maintained a web platform for the annual Future Leaders Summit using Next.js and Spring Boot. Led full-stack development efforts to ensure a seamless user experience, handling both frontend and backend challenges efficiently.

### **Backend Intern | May 2021 - Aug 2021**

RUBICON

Selected among 200 applicants for a backend engineering internship. Worked on an internal application for RUBICON employees, gaining hands-on experience in C#, .NET, and REST API development while improving software performance and scalability.

## **Academic History**

### **Bachelor of Computer Science (BCompSc) | Sep 2019 - Jun 2023**

University Sarajevo School of Science and Technology

Partnered with Buckingham University, United Kingdom. All courses and coursework conducted in English. Graduated with honors, recognized as one of the top students for academic excellence. Served as a student assistant and course demonstrator in Programming, Operating Systems, and Discrete Mathematics. Led coding summer schools and played an active role in the Entrepreneurship Club, driving innovation and fostering a collaborative environment.

### **High School Diploma | Sep 2015 - Jun 2019**

Gymnasium Visoko

Graduated with honors in Computer Science and Mathematics, excelling in STEM subjects and laying the foundation for advanced studies in computer science.

## **Awards and Certification**

### **Annual Certificate of Outstanding Academic Achievement for 2022/2023 (GPA of 9.78)**

University Sarajevo School of Science and Technology

### **Annual Certificate of Outstanding Academic Achievement for 2021/2022 (GPA of 9.83)**

University Sarajevo School of Science and Technology

### **Annual Certificate of Outstanding Academic Achievement for 2020/2021 (GPA of 9.75)**

University Sarajevo School of Science and Technology

### **Annual Certificate of Outstanding Academic Achievement for 2019/2020 (GPA of 9.50)**

University Sarajevo School of Science and Technology

## **Work**

### **BosnianGems (Founder & CTO)**

<https://www.bosniangems.com/>

A platform designed to promote tourism in Bosnia by showcasing hidden gems and travel destinations.

### **Perkard (Founder & CTO)**

<https://perkard.com/>

A digital loyalty program that helps businesses retain customers through QR-based point tracking.
